

Cellebrite Inse^{ts}ts.

Inse^{ts}ts vs. UFED vs. Premium

In a constantly-evolving digital landscape, there is a tremendous need for efficient solutions. With a surge in devices and data volume, inaccessible information presents a major hurdle to overcome. Not only does it slow case progress, it risks missing crucial evidence.

What you need:

- A thorough, reliable and highly efficient method to access, extract and analyze data from iOS and Android devices.
- The ability to process devices quickly and reach key evidence easily and efficiently.

Access to

5x

More iOS and Android Devices

60%

Richer Evidence

2x

Faster Surfacing of Critical Evidence

Up to

40%

Faster Examinations
